

SC 40RT

Scanjet tank cleaning equipment

Scanjet Model SC 40RT is a robust and very flexible type of tank cleaning machine specially designed for marine and offshore applications. Scanjet Model SC 40RT is driven by the cleaning media by means of a fixed installed turbine with an integrated drive unit.

Twin nozzle tank cleaning machine

The SC 40RT gives the user the possibility to optimise the cleaning operation and is preprogrammed to minimize the use of time, energy and cleaning media.

Magnetic transmission and grease lubrication

The drive unit can be removed without oil spill exposing the tank to the outside atmosphere.

SC40 RT has very few moving parts requiring a minimum of service and is maintenance free inside tank.

Adjustable rotation speed

The rotation speed can easily be adjusted on the driving unit.

Typical applications for SC 40RT

- Chemical carriers
- Product carriers
- Offshore applications
- River barges
- Deck tanks
- Recidual tanks

KEY FEATURES

SC 40RT

- Magnetic Transmission
- Strainer standard
- Integration with WashTrac™ (option)
- Drive unit can be removed without exposing tank to atmosphere
- No gearbox inside tank
- AISI 316 and PTFE
- Grease lubricated
