

# Tank and hold cleaning equipment

Shaping the future in tank cleaning

## OUR CONCEPT

Our business mission is to co-operate directly with our customers. This concept, together with the specialised fabrication in our own workshops using the latest production technology, ensures our customers of an operator environmental friendly and high quality range of products.

## Scanjet – world's leading producer of tank cleaning equipment

Scanjet produces a range of tank cleaning machines to match any marine, offshore or industrial demand for an efficient and environmentally friendly installation. Our qualified design team is always ready to assist in providing optimised technical specifications prior to installation ensuring that our clients will receive a Scanjet tank cleaning machine installation which will consist of the most modern and efficient tank cleaning technology available.

## REFERENCES

The extensive reference list of installations consists of more than 62.000 contracted Scanjet tank cleaning machines

### Crude oil tankers

Crude oil carriers require our larger machines with high capacities for sediment control to meet Marpol regulations.

### Product carriers

For product carriers the Scanjet installation is outmost importance for vessel's safety and contribute positively to general economical running of the ship.

## Quality and Performance

We are committed to meet the highest standards of quality and performance. We are constantly on the hunt for improvements and continuously work to develop our products.

Our test facility also makes it easier for us to develop new products and prototypes while also optimising the performance of existing products.

Computerized shadow diagram calculation is made for optimised locations for fixed installations.

### FPSO

For FPSO vessels there are Scanjet installations available meeting all applicable requirements.

### Chemical carriers

For chemical carriers the Scanjet installation is of outmost importance for the vessel's safety and contribute positively to general economical running of the ship.

## KEY FEATURES

- Complete range of tank cleaning equipment
- Production and testing in Sweden
- Free design service
- Separated lifting and turning movements in drive unit
- WashTrac - tank cleaning monitoring system
- Magnetic Transmission

### Bulk carriers

For bulk carriers Scanjet provides different solutions for cleaning of holds.

### Offshore

Offshore supply vessels are using our low capacity machines for cleaning of drilling mud and brine tanks.

## Production in Sweden

Our production plant in Sweden

## Sales and Service

### Representatives around the world

Scanjet is represented by an extensive sales and service network around the world. For more information and contact details visit our website: [www.scanjet.se](http://www.scanjet.se)
